Text from image:

`prompt ( Optional[ Prompt ] , default: None )` – An optional prompt for the LLM. Can take a few different forms:

- `str`: This is converted to a `SystemMessage` and added to the beginning of the list of messages in `state["messages"]`.
- `SystemMessage`: this is added to the beginning of the list of messages in `state["messages"]`.
- `Callable`: This function should take in full graph state and the output is then passed to the language model.
- `Runnable`: This runnable should take in full graph state and the output is then passed to the language model.
